

## **Criminal Polygraph Examinations:**

A Criminal polygraph exam is usually one in which the subject is accused of a crime but denies involvement. The exam is an investigative tool used to assist Law Enforcement in determining a subject's involvement in a crime if any. As such, it is very useful in determining a subject's guilt or innocence.

If the exam is done at the request of a Defense attorney, the goal is for the attorney to know the truth so as to better prepare for the defense of the client.
